PROFILE

Well-rounded IT Professional in search of the next great software application project. Excellent problem solver using technology to address business challenges, easy to work with, and possess solid communication skills.

SKILLS

React / Next.js, Javascript / Typescript, React Native, Angular, Vue, Jest, Cypress, HTML, CSS/SASS/Tailwind, UI Design

EXPERIENCE

Software Developer, Cupertino, CA — 2015-present

Contract developer, working with various teams to build React web and mobile applications.

- Collaborated closely with stakeholders to meet business objectives. Identified and mitigated risks, clarified questions, and eliminated impediments.
- Companies: Yahoo, Apple, SAP, Druva, Aurea Software, and Silicon Valley Bank

UI Developer, Grid Dynamics, Santa Clara, CA — Jan, 2020 - Apr 2021

Developed, maintained and refactored React/Typescript code for a leading software banking application. Experience with full lifecycle of each project, from spec review and coding to unit testing and deployment.

UI Developer, eHealth, Mountain View, CA — 10/2012 - 12/2014

Developed various eHealth applications including the corporate website and mobile application, resource center, Medicare, and Affordable Care Act sites.

- Lead engineer managing a full-scale site redesign for the corporate site, beginning with design and prototyping to implementation of specific pages and components.

UI Developer, IMVU, Mountain View, CA — 4/2012 - 10/2012

Along-side the UI Design team, developed and prototyped new features and functionality based on their design. Conducted multiple user tests and refined and refactored components to meet user requirements.

Sr. Web Developer, Uptake, Palo Alto, CA — 4/2011 - 4/2012

Developed and maintained a full-scale site redesign and development for this leading travel recommendations website.

Sr. UI Developer, Apple (contract), Cupertino, CA — 3/2009 - 4/2011

As developer for the Apple Online Store team, successfully built-out, maintained and enhanced components and pages, as needed by client.

- Developed landing pages, online store page components, and participated in new product introduction site launch. Handled various bug-fixes. Collaborated with multi-functional team.

Web Developer, Ooma, Palo Alto, CA — 3/2008 - 11/2008

Lead web developer for Ooma web public facing website. Maintained and created new pages and components to meet customer demand.

Founder/Web Developer, Piczo, San Francisco, CA — 1/2002 - 12/2007

Founding team member (employee #2). Piczo was a teen-focused social network that empowered teens to express themselves, build communities and share experiences. Once one of the top teen social sites worldwide, with 14M monthly unique visitors (according to Comscore).

- Took lead development role for the front-end interface for this site, which garnered over 2.5 billion page views and 14 million unique visitors per month at its peak.

Web Programmer, The Dialog Corporation, Mountain View, CA — 1/2001 - 12/2002

Lead Cold Fusion programmer for this leading provider of online-based information services.
